

## Ascension SmartHealth HDHP Preventive Maintenance Drug List

The Internal Revenue Service (IRS) guidelines for HSA-eligible high deductible health plans (HDHPs) allow coverage of certain preventive medications prior to meeting the deductible. Drugs on this list were evaluated and selected based on IRS guidelines and clinical validation to ensure that the indications for which they are commonly prescribed are considered preventive within established guidelines. VytlOne is not a tax advisor and does not represent or warrant that this list complies with IRS guidance or other applicable legal requirements. Health plan sponsors should seek the advice of their legal counsel or tax professional before adopting this list. Please note: Drugs on this list may have multiple indications, some of which are not considered preventive under IRS guidelines. This list contains examples of preventive medications, is not all-inclusive, and does not guarantee coverage. Some formulations (i.e. creams vs. tablets) or strengths of a drug on this list may not be considered preventive. Restrictions including coverage exclusions, prior authorizations, quantity limits, or step therapy requirements may still apply. Please contact VytlOne if you have any questions regarding coverage.
